

## Sample GUI

Your GUI should allow a user to enter tutoring time and payment for session, as well as implement functionality for "Quit," "Enter," and "Run Report" buttons, as shown below.

The image shows a sample GUI window titled "Tutoring Wages Report". The window has a blue title bar with standard Windows window controls (minimize, maximize, close) on the right. The main area is light gray. It contains two input fields: "Tutoring Time in Minutes" with the value "60.00" and "Payment for session in dollars and cents" with the value "10.00". Below these fields is a large, empty text area with a vertical scrollbar. To the right of the text area are three buttons: "Enter", "Run Report", and "Quit".

Tutoring Wages Report

Tutoring Time in Minutes: 60.00

Payment for session in dollars and cents: 10.00

Buttons: Enter, Run Report, Quit
